M3Vision mobile application

M3Vision Mobile enables users to collect condition and energy data using predefined survey designs and update attribute and asset information on-site. Built as a cross-platform MAUI application, it supports offline data collection at any time.

M3Vision web application

M3Vision is a hosted solution accessed through any modern web browser. Technically M3Vision is a .NET 5 application utilising Blazor WebAssembly. M3 is ISO 9001, 27001 and 14001 certified.

Technical Specification

- Web Based Solution
- NET 8 Blazor Web Assembly SPA (Single Page Application)
- Compatible with all modern browsers and devices
- Hosted on Microsoft Azure for maximum scalability and resilience
- Secured through industry-standard authentication and encryption protocols.
- API integration is possible through 750+ endpoints for any number of back-end operations.
- PowerBi Reporting Ready through exposed bespoke Views.
- Deployed with modern CI/CD pipelines to ensure maximum uptime.
- Compliant with NCSC Cloud Security Principles.
